NLH Nursing Analytics

3rd Quarter – October 2019

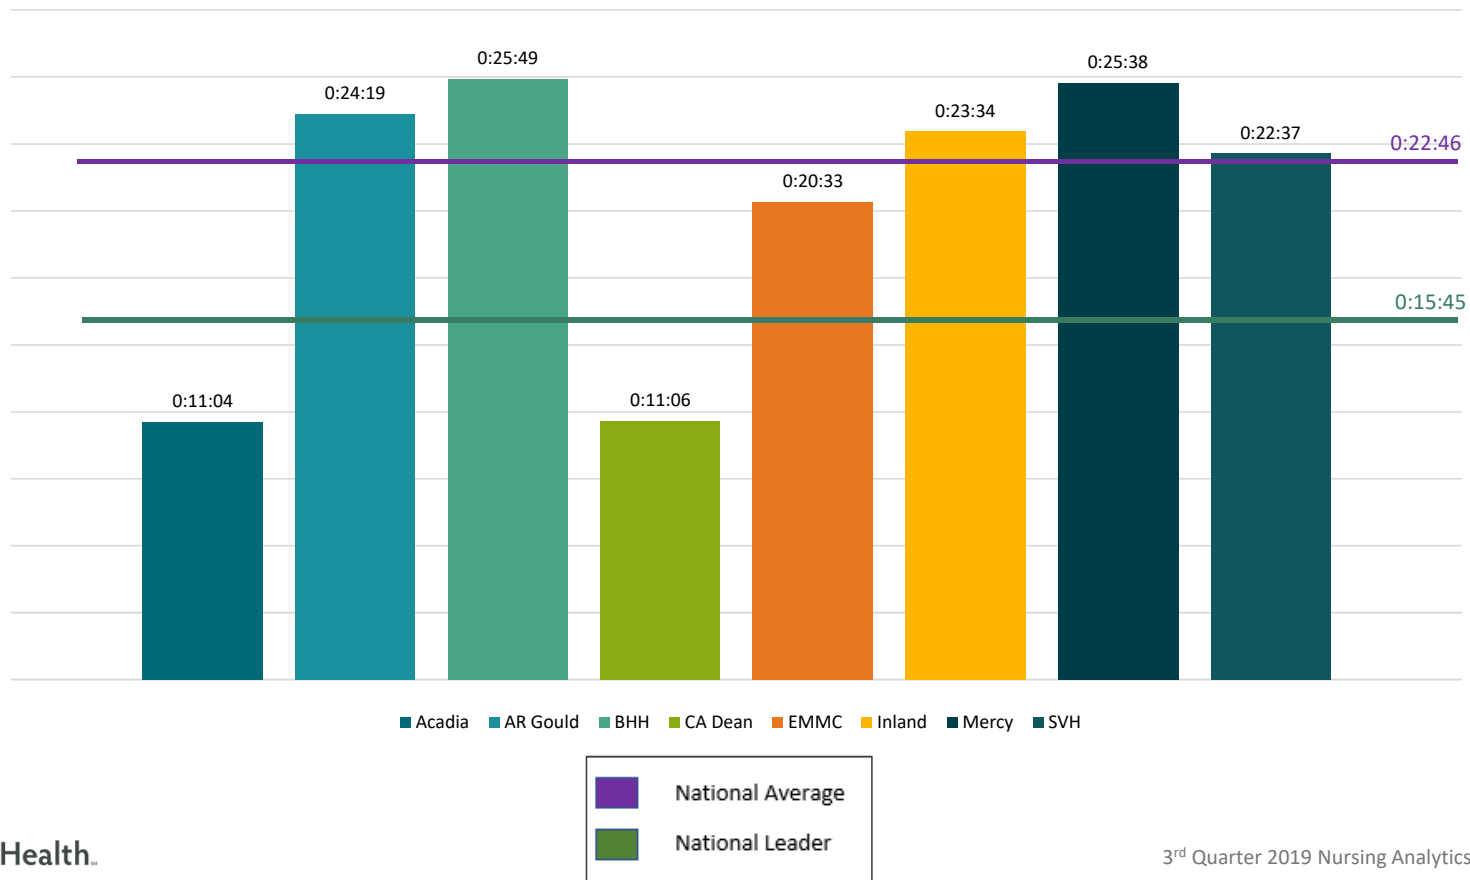

|

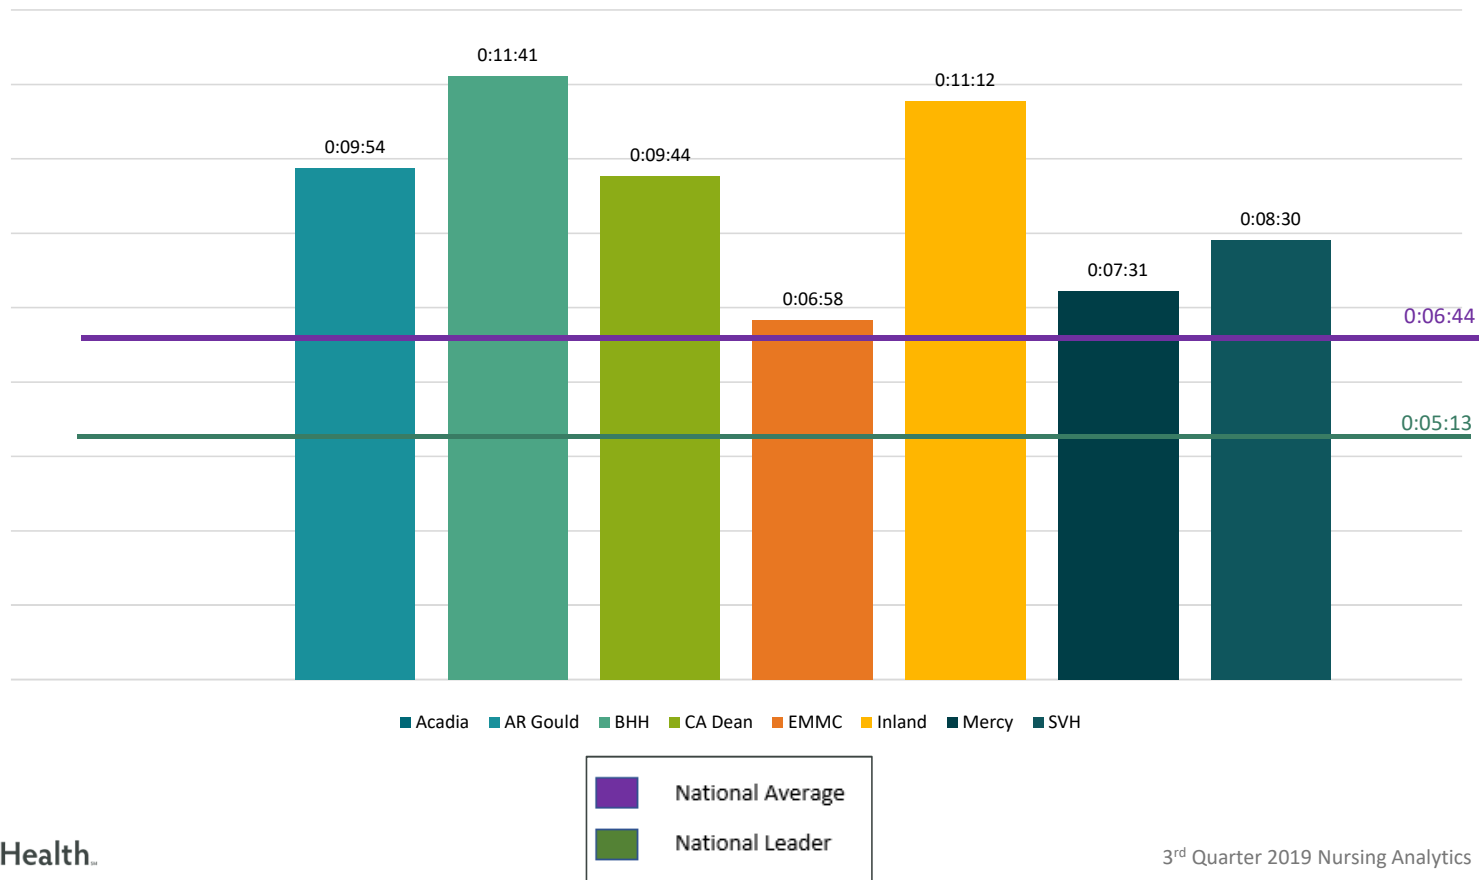

Slide 1

CT9 Put positions included on all slides (question for Colleen)
Coleman, Trisha, 7/2/2019

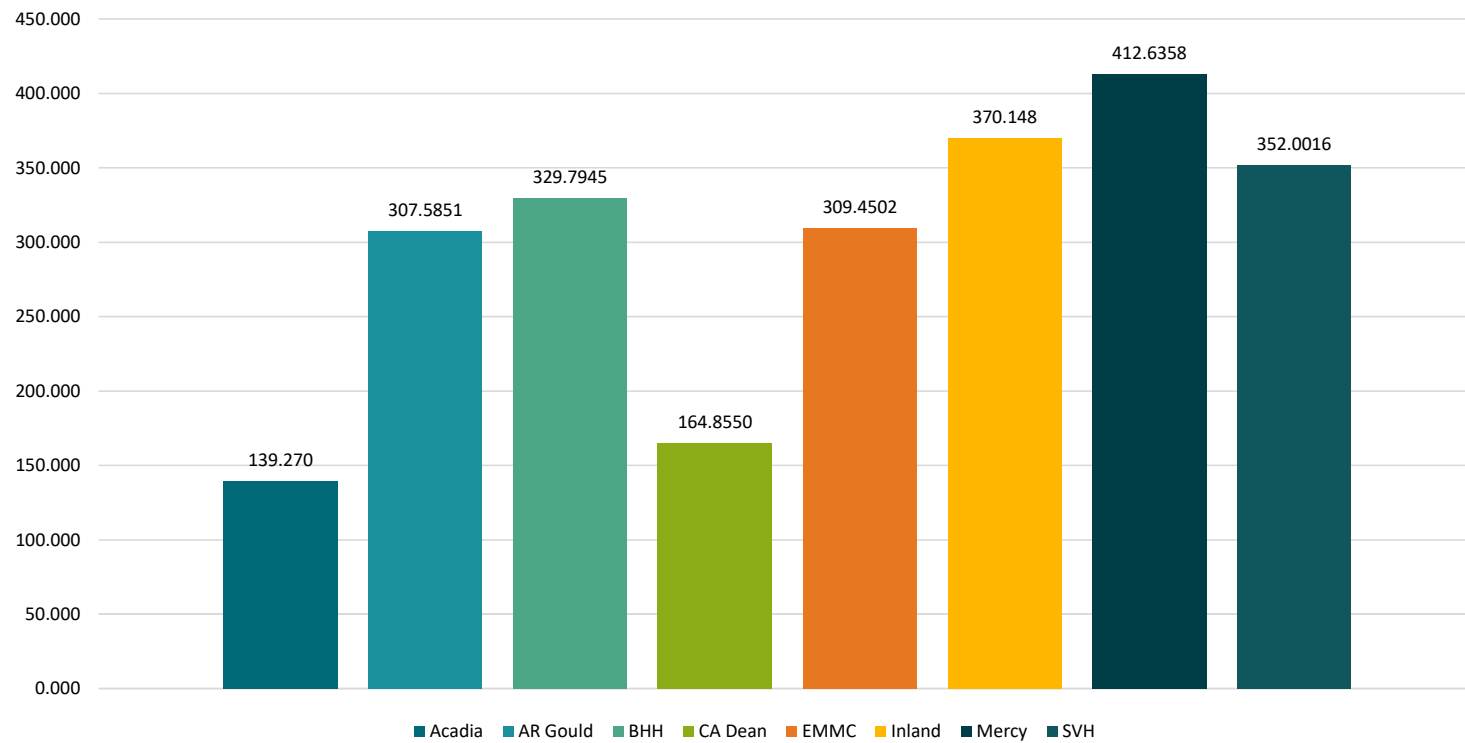

RN Average Time in EMR – Inpatient Per Patient, By MO – September 2019

Emergency RN Average Time in EMR – Emergency Per Patient, By MO – September 2019

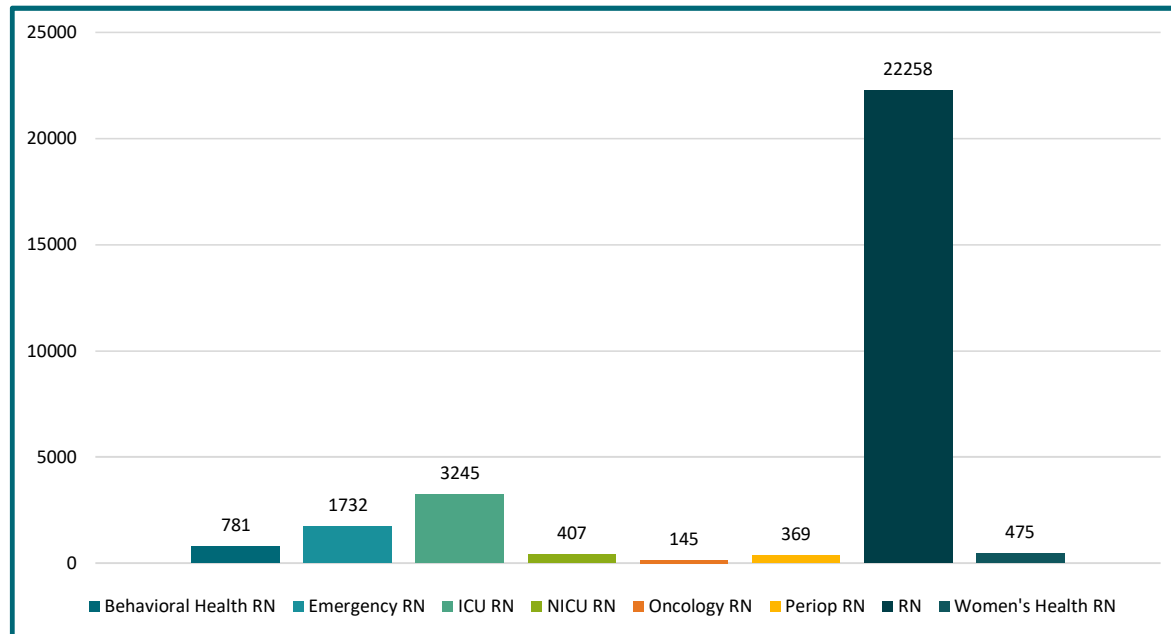

RN Average Clicks – Inpatient Per Patient, By MO – September 2019

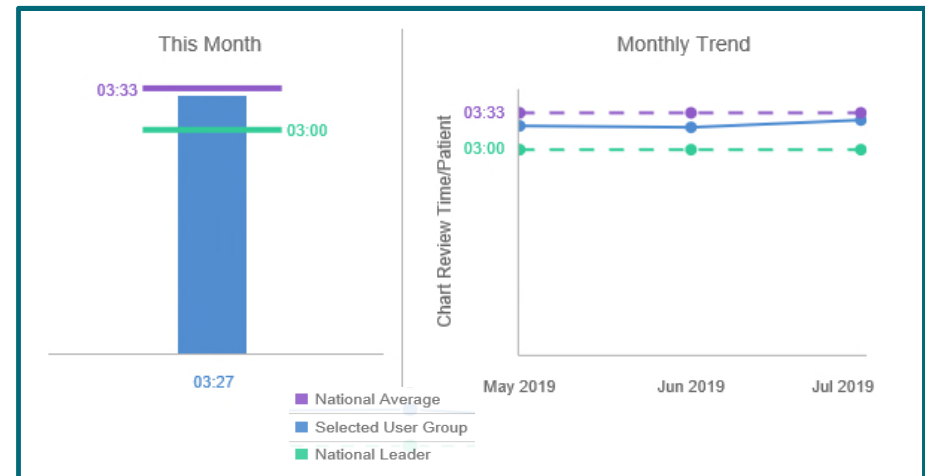

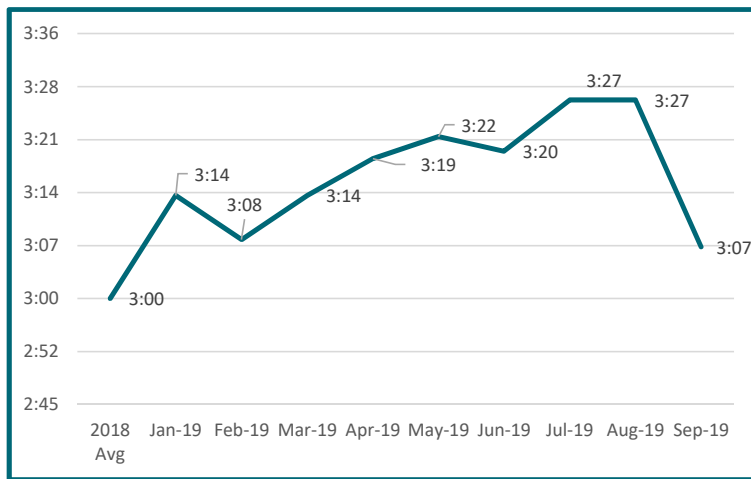

Meds Back Charted *by position* September 2019

Total number of medications that are charted more than 60 minutes after the scheduled administration time. Note: The calculated time is based upon entry into Cerner Millennium and not the actual administration time of the medication.

RN Average Time in EMR – Chart Review Inpatient

Emergency RN Average Time in EMR – Chart Review Emergency

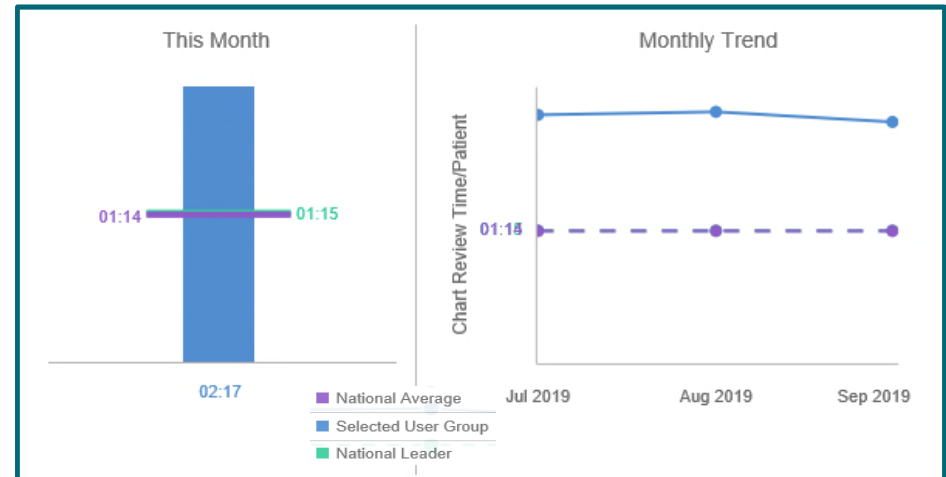

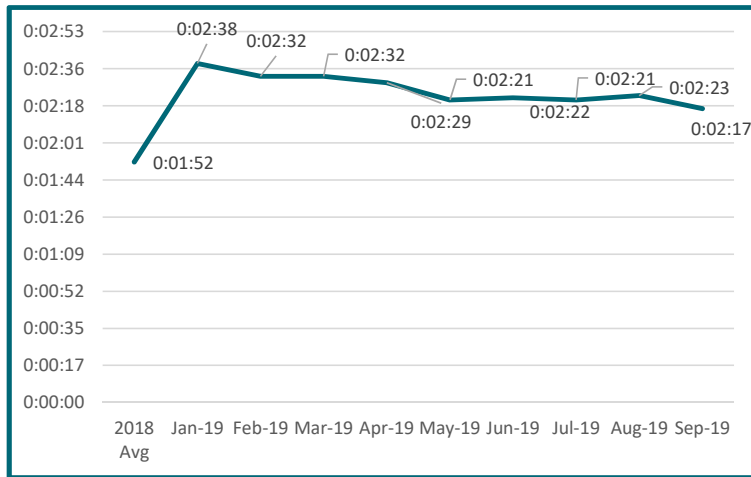

Chart Review (Inpatient) – RN Average Time per Patient By Member Organization

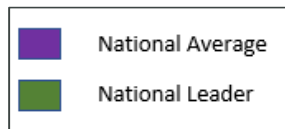

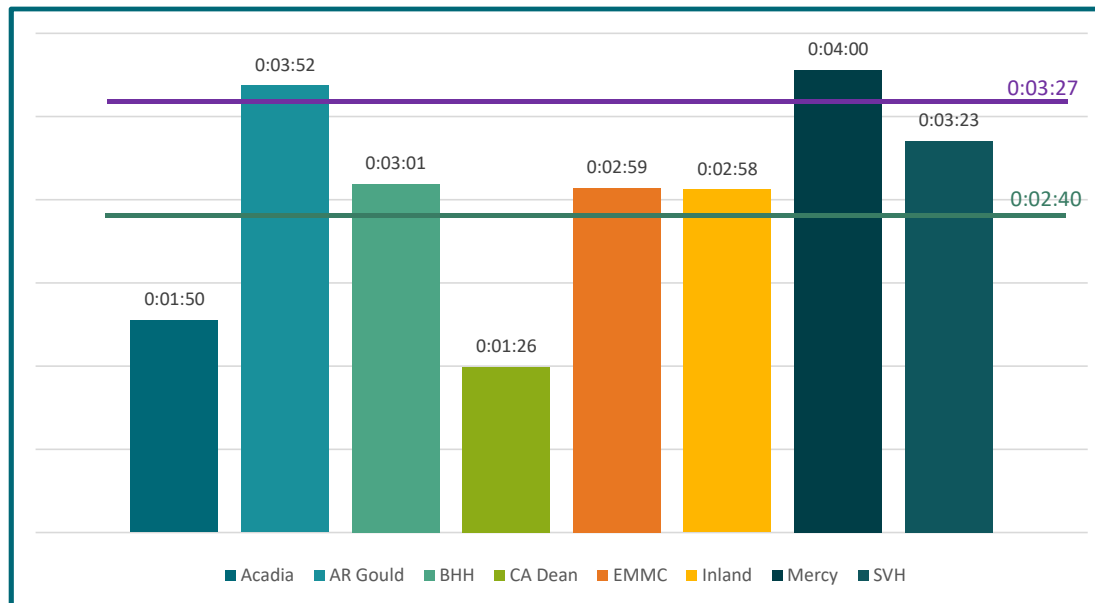

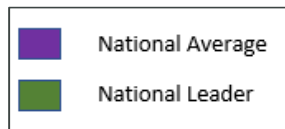

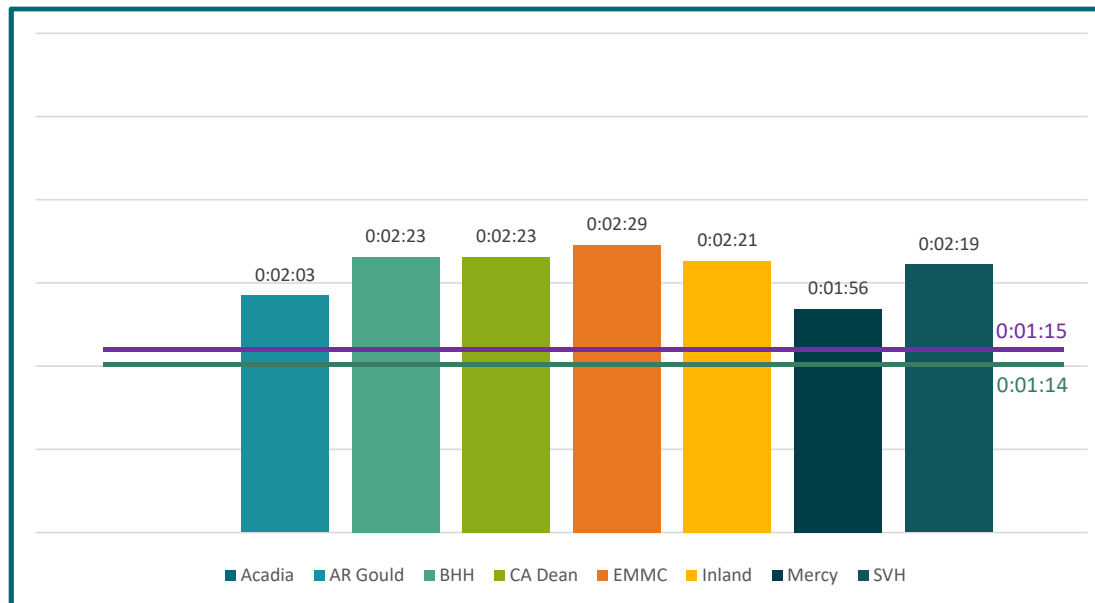

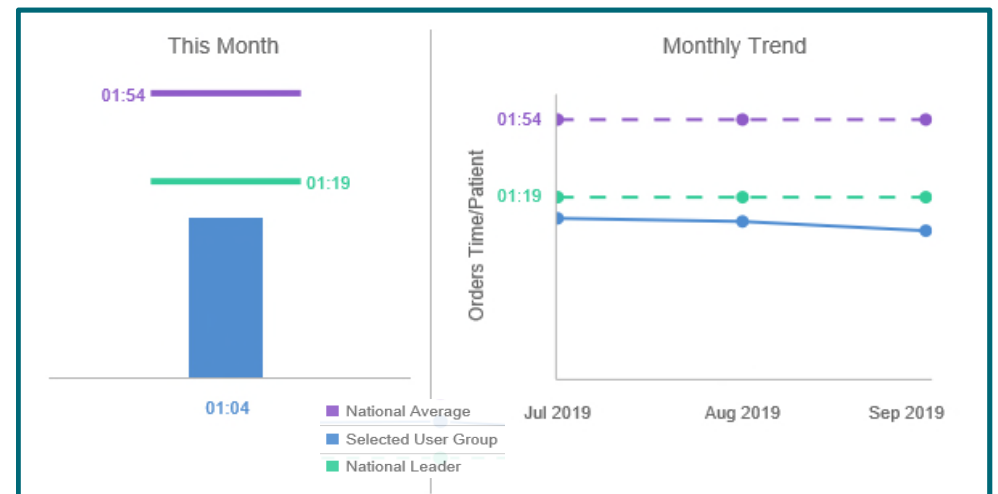

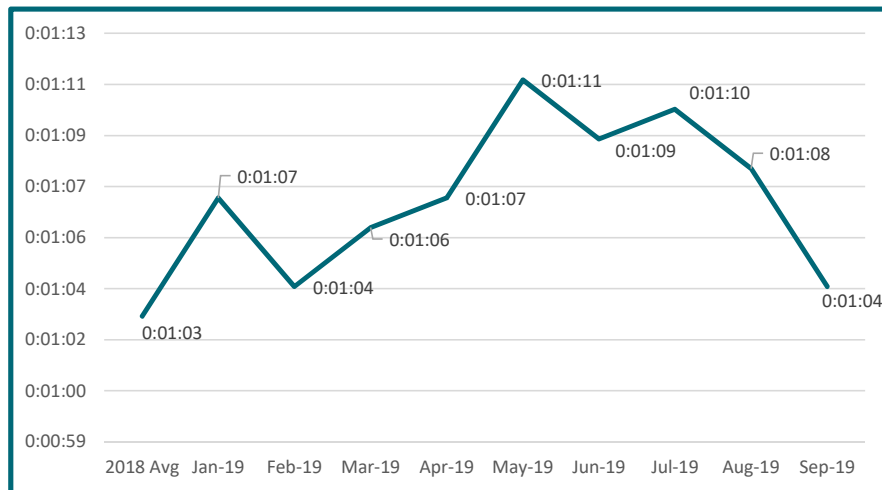

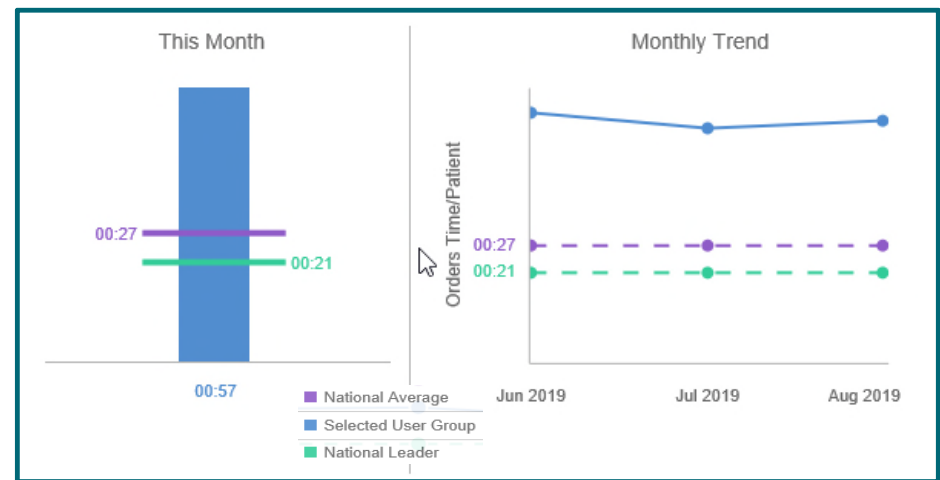

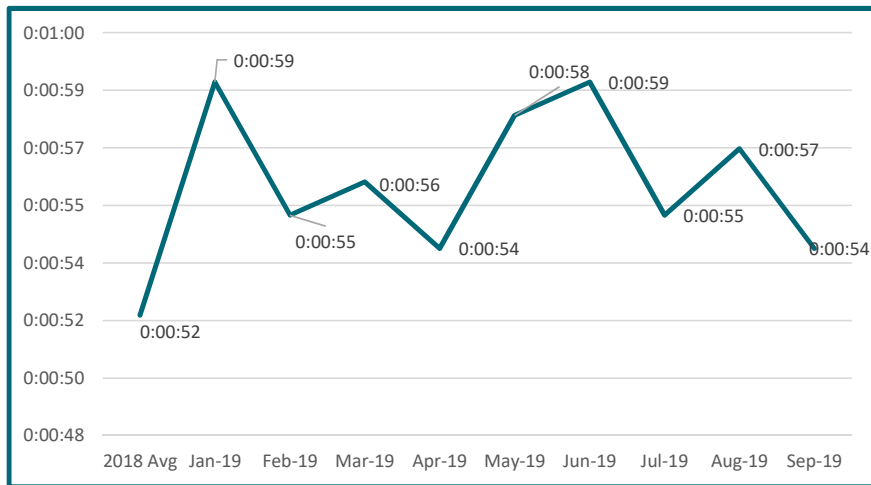

Chart Review (Emergency) – Emergency RN Average Time per Patient By Member Organization

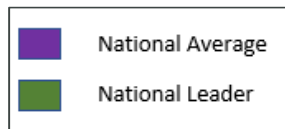

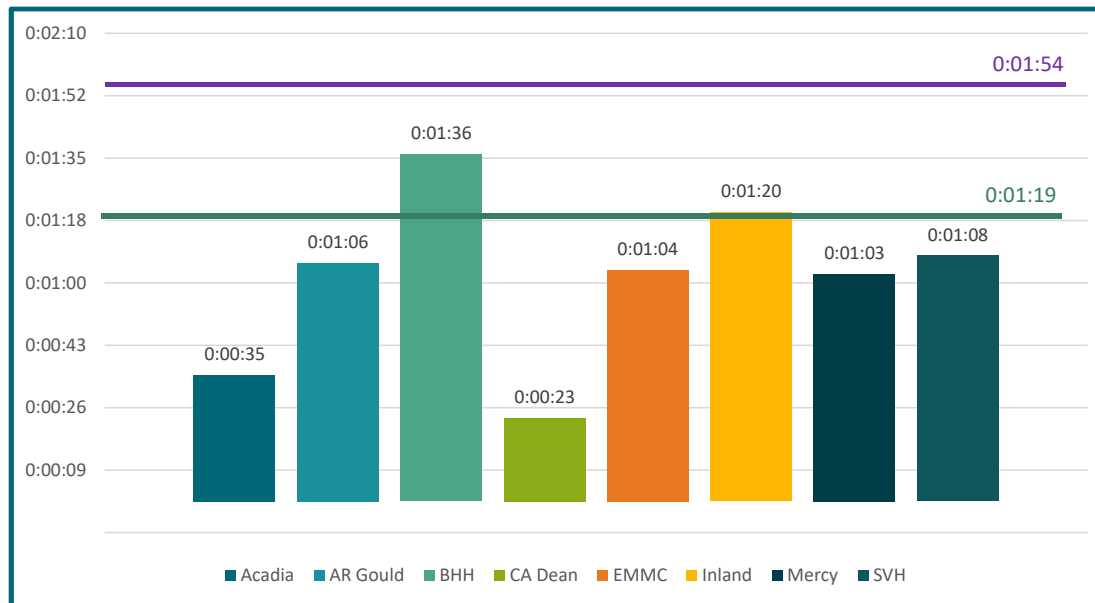

RN Average Time in EMR – Orders Inpatient

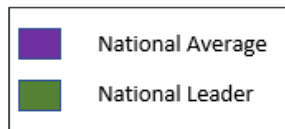

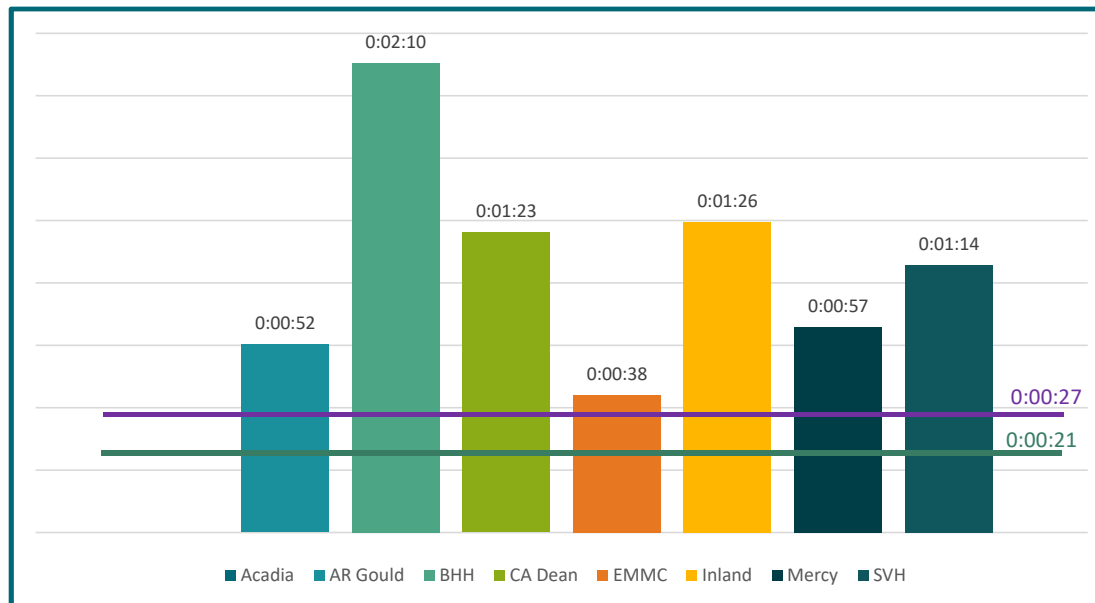

Emergency RN Average Time in EMR – Orders Emergency

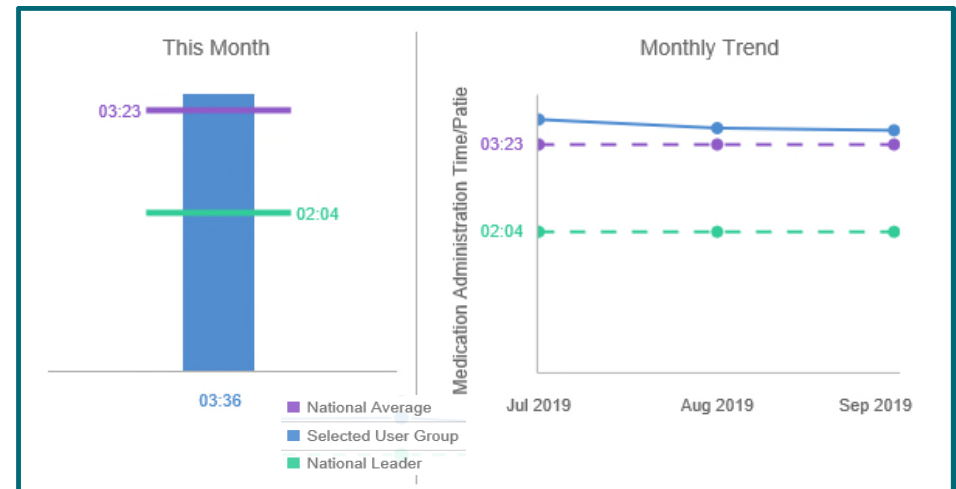

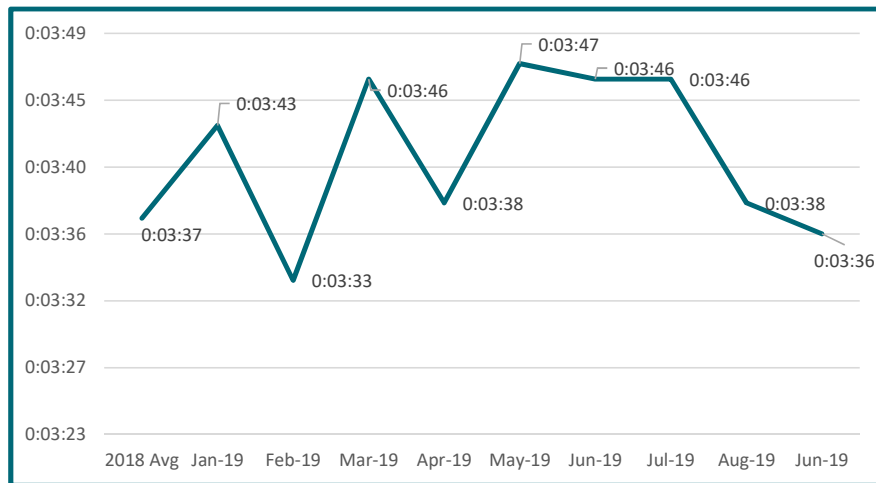

Orders (Inpatient) – RN Average Time per Patient By Member Organization

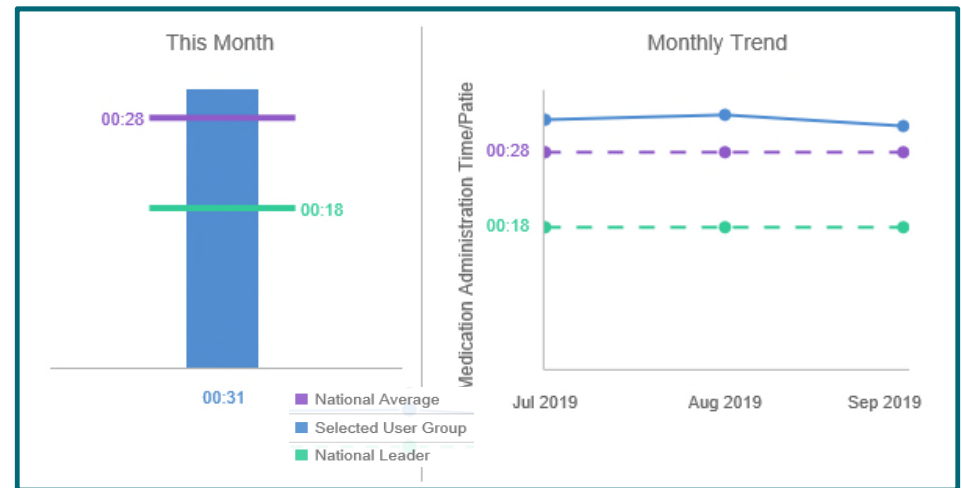

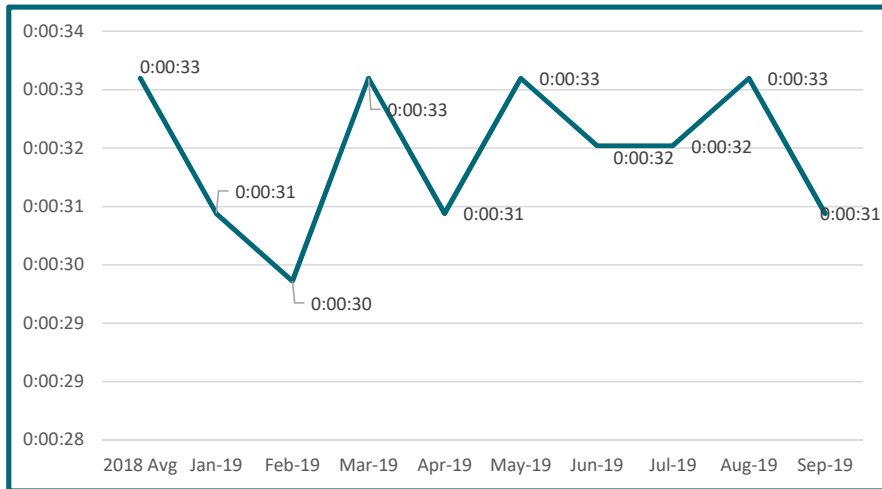

Orders (Emergency) – Emergency RN Average Time per Patient By Member Organization

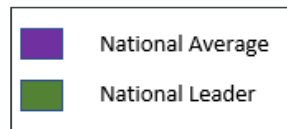

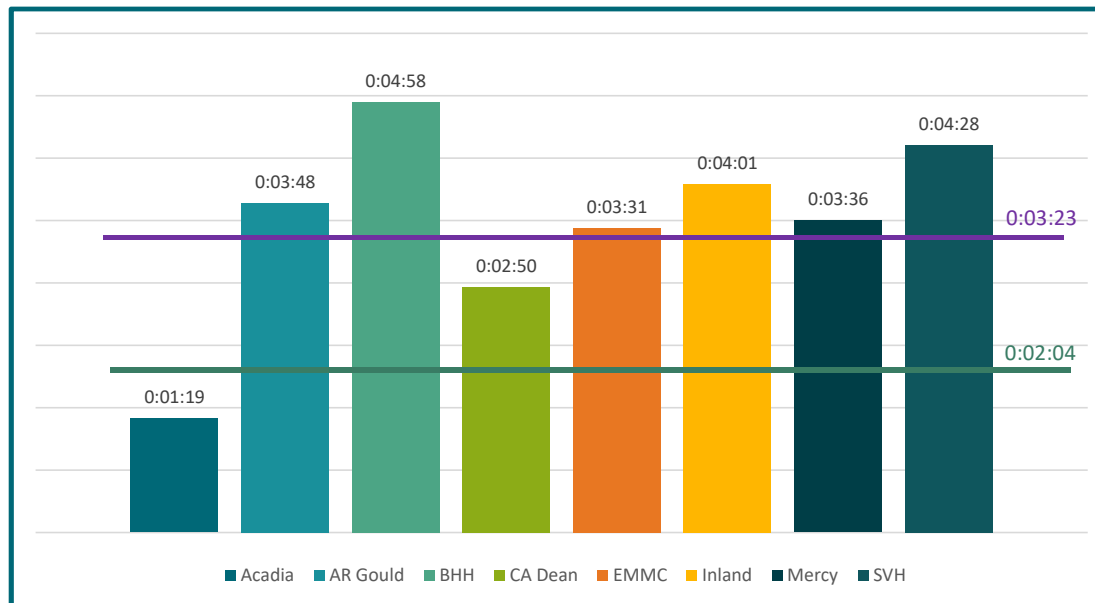

RN Average Time in EMR – Med Administration Inpatient

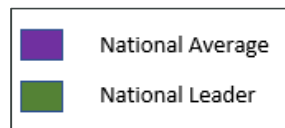

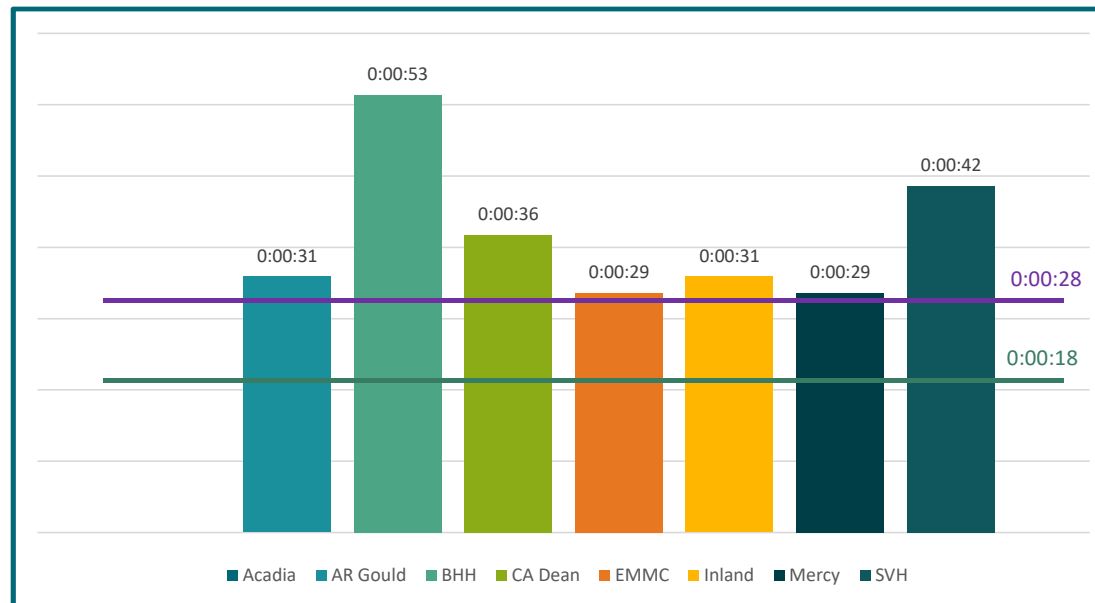

Emergency RN Average Time in EMR – Med Administration Emergency

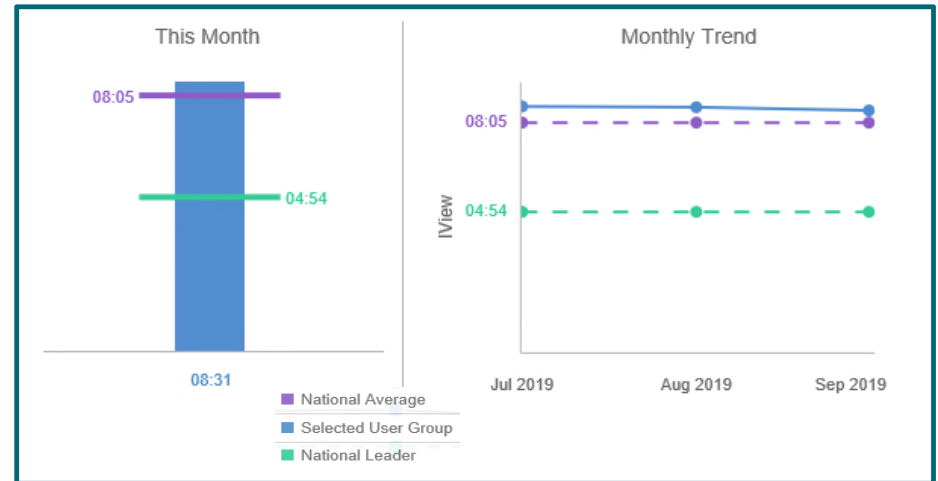

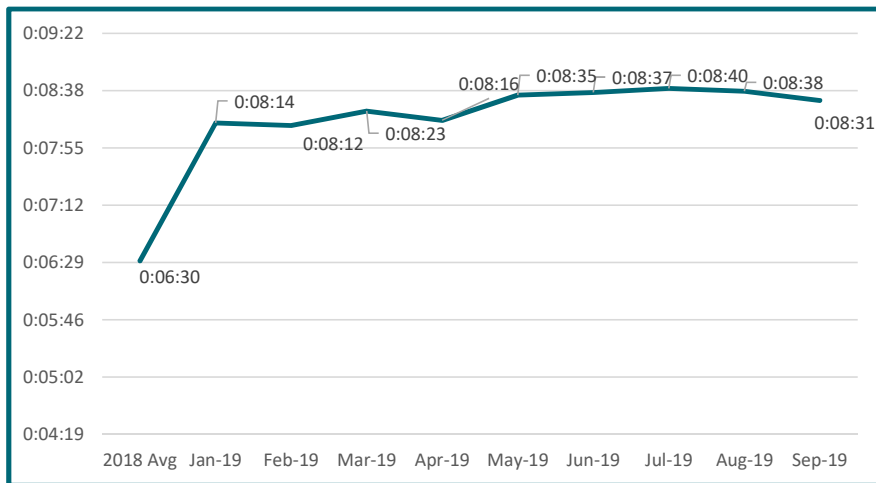

Med Administration (Inpatient) – RN Average Time per Patient By Member Organization

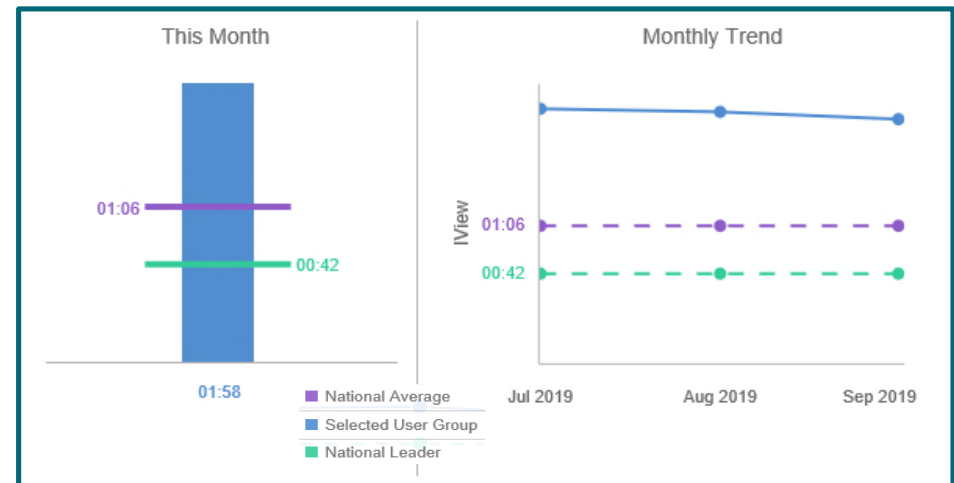

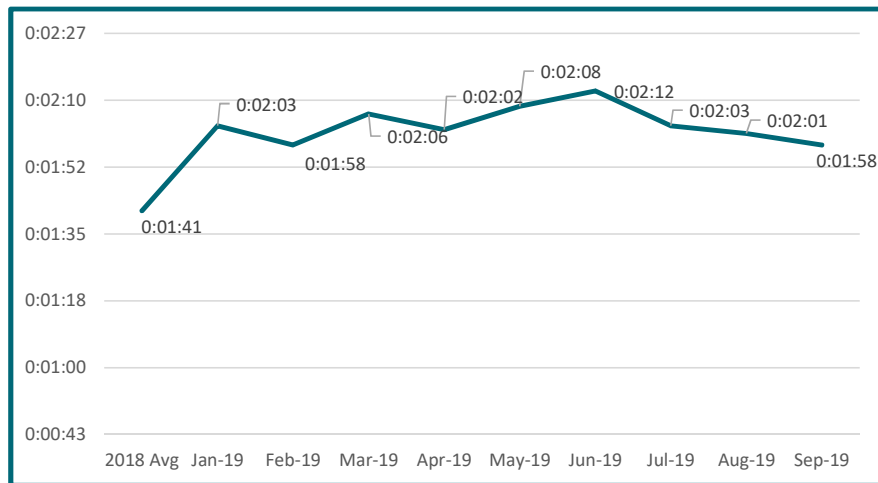

Med Administration (Emergency) – Emergency RN Average Time per Patient By Member Organization

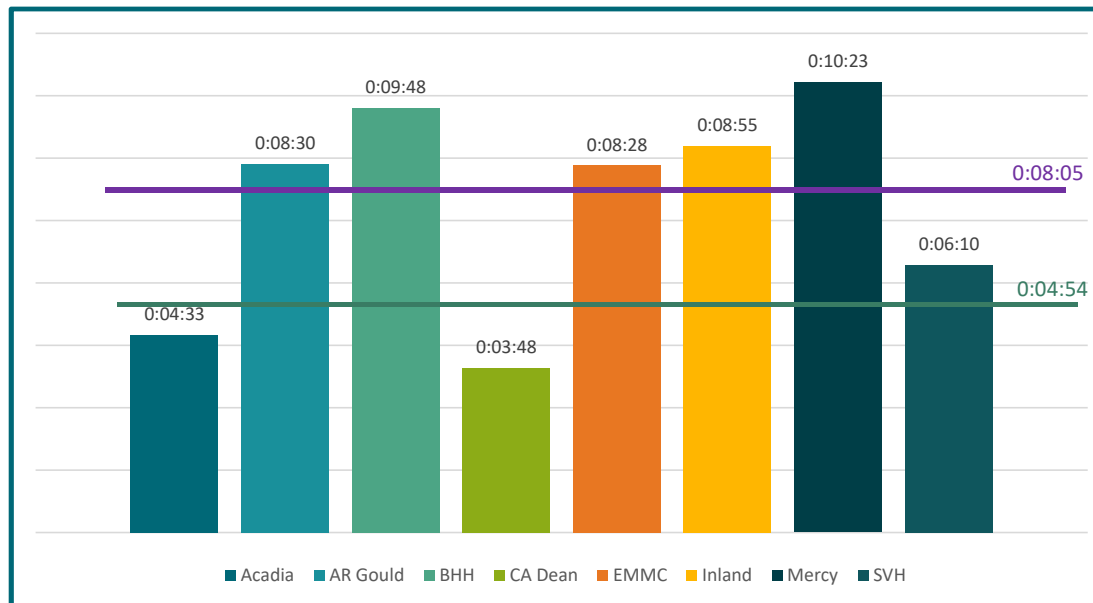

RN Average Time in EMR – Documentation via iView Inpatient

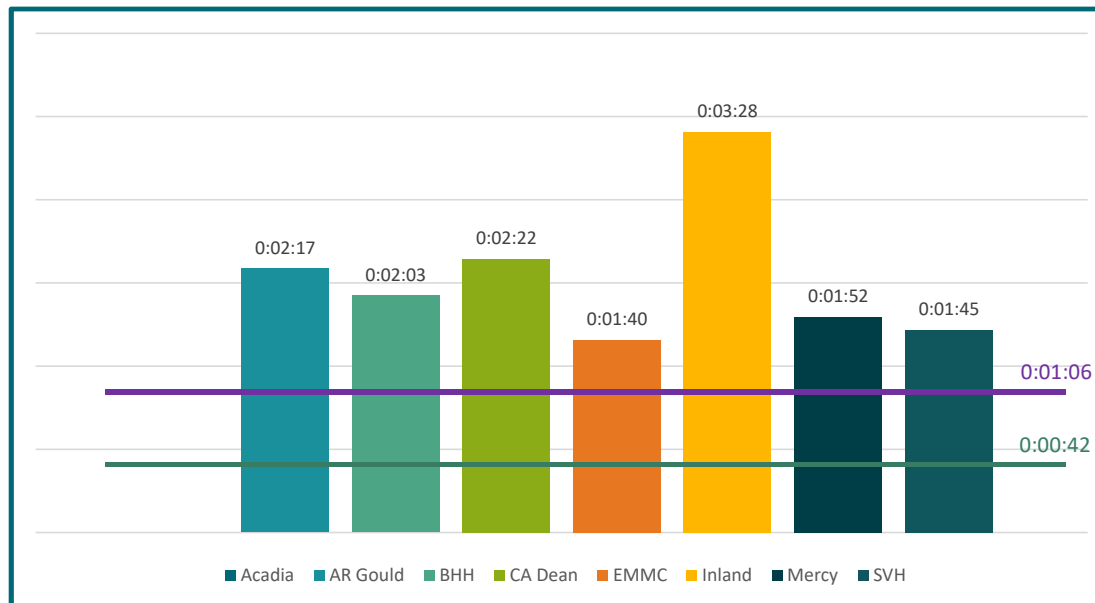

Emergency RN Average Time in EMR – Documentation via iView Inpatient

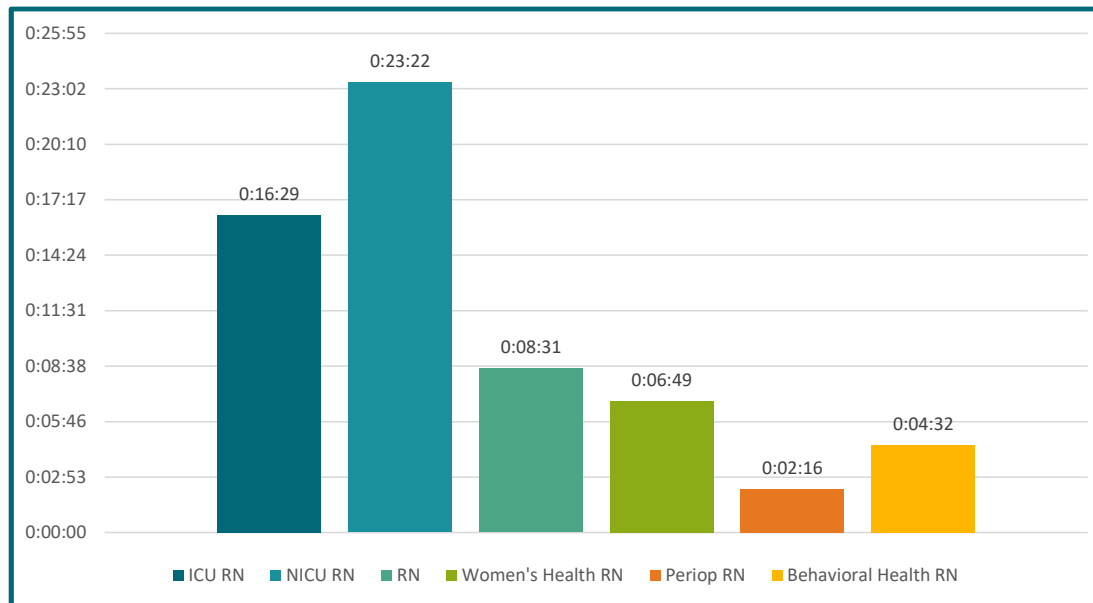

Documentation Time iView (Inpatient) – RN Average Time per Patient By Member Organization

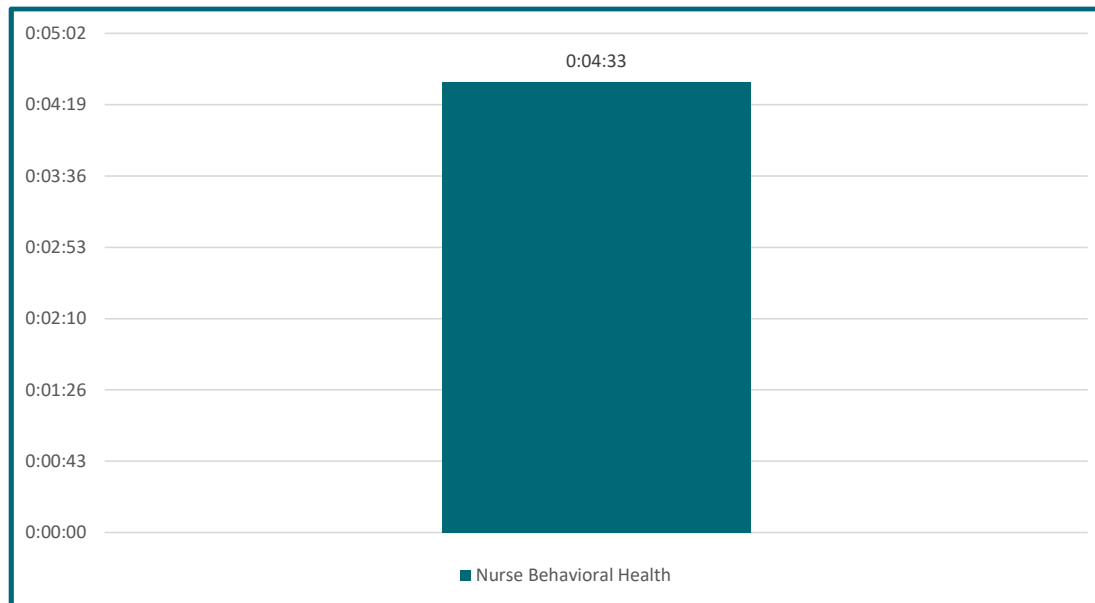

Documentation Time iView (Emergency) – Emergency RN Average Time per Patient by Member Organization

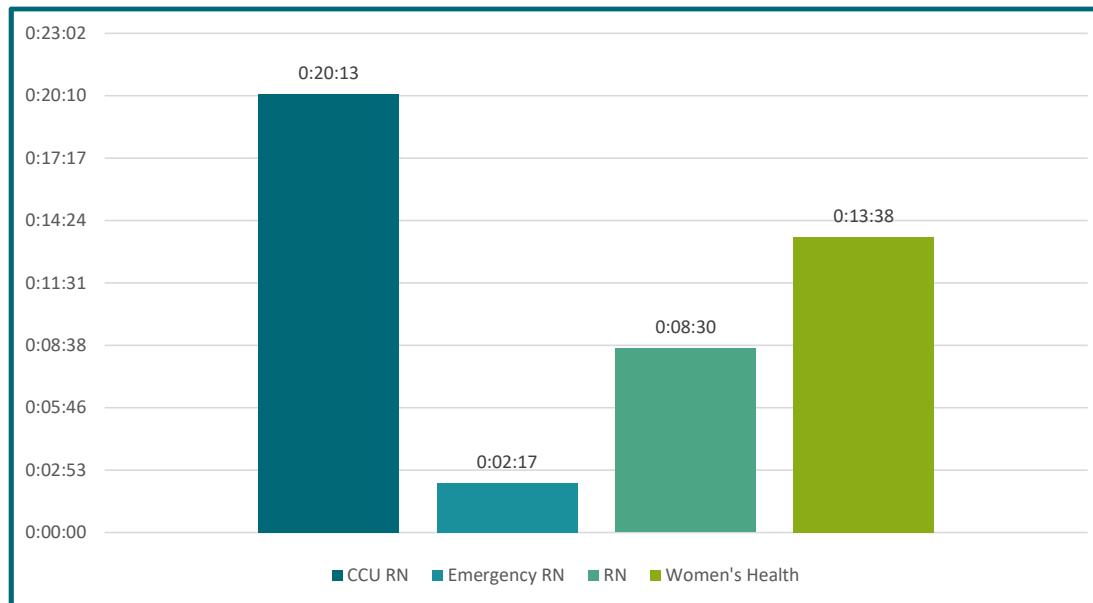

Documentation iView Time – Average Time per Patient By Position – Inpatient

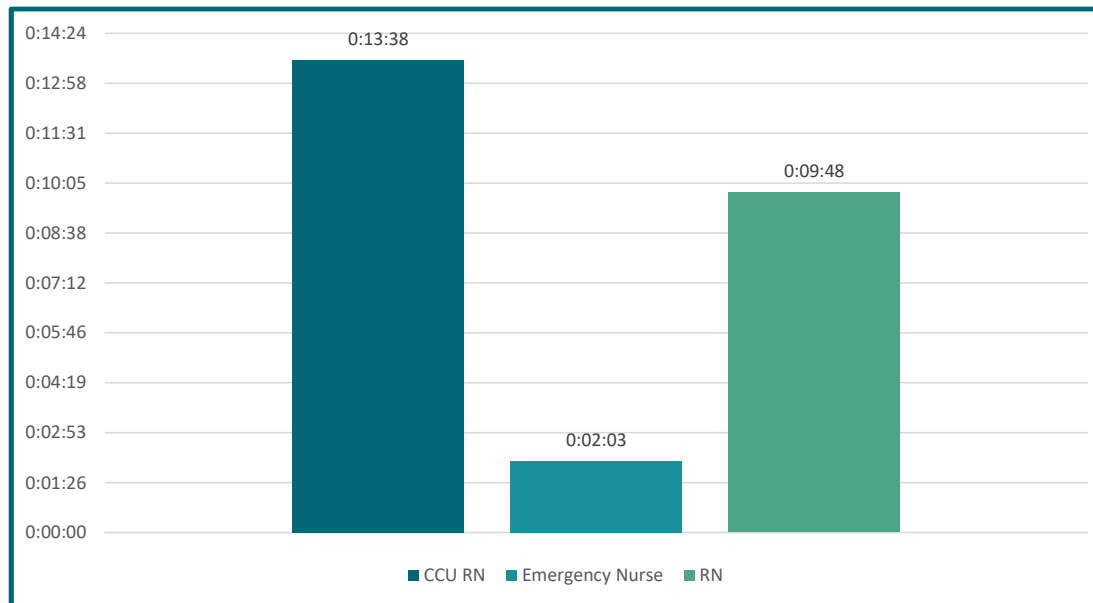

Documentation iView Time – Average Time per Patient by Position at Acadia

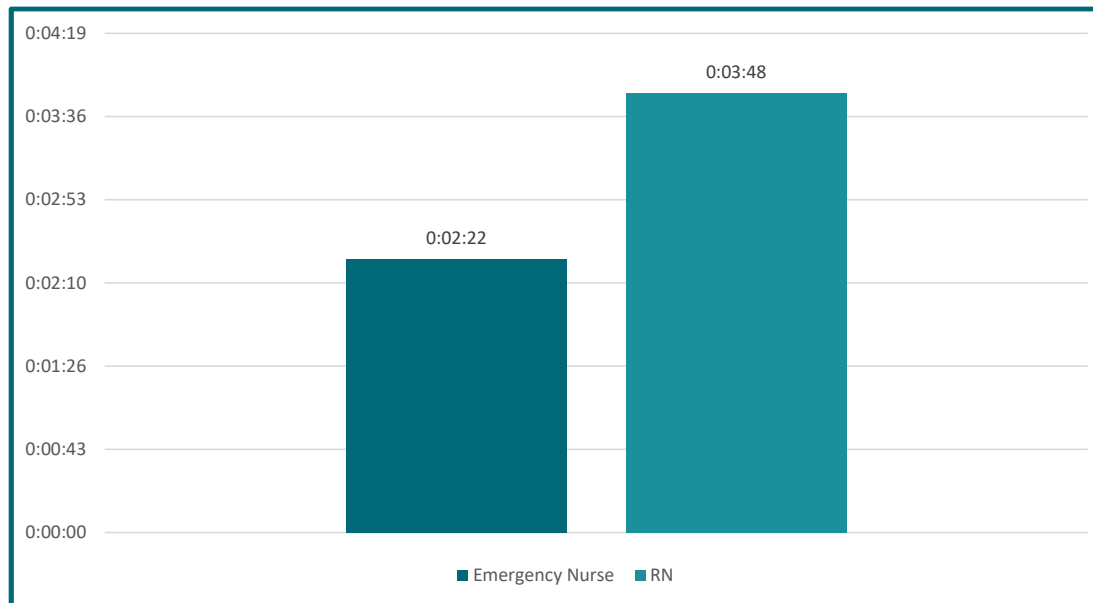

Documentation iView Time – Average Time per Patient by Position at AR Gould

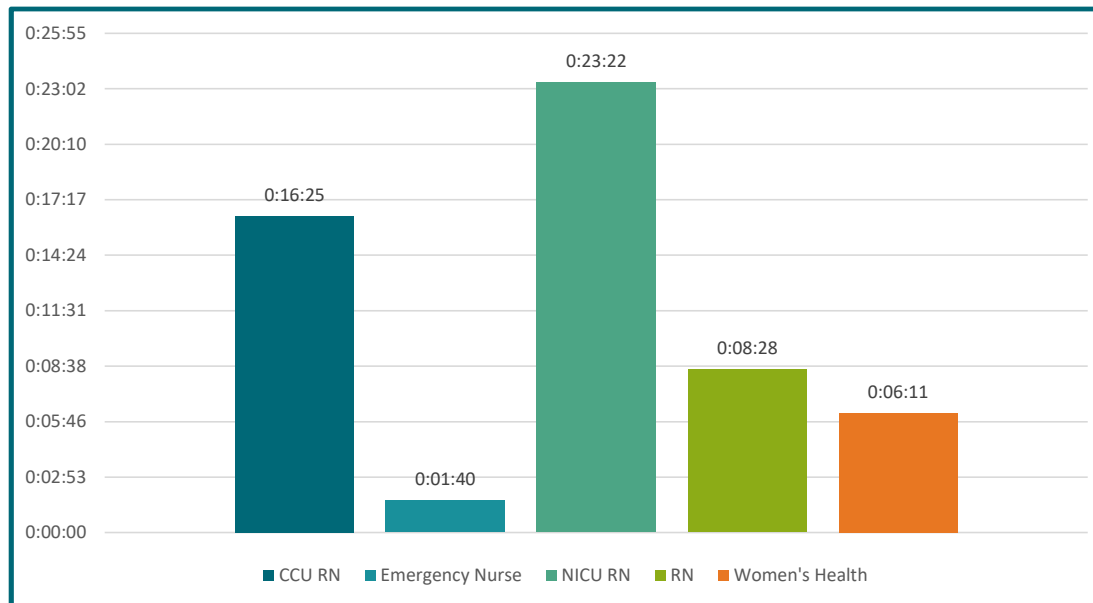

Documentation iView Time – Average Time per Patient by Position at Blue Hill

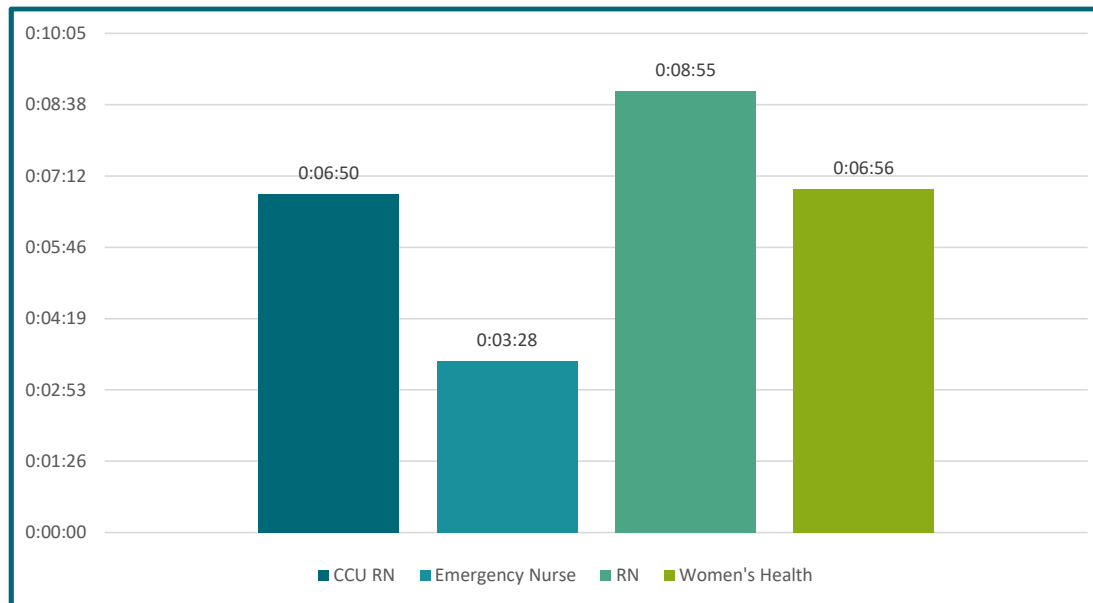

Documentation iView Time – Average Time per Patient by Position at CA Dean

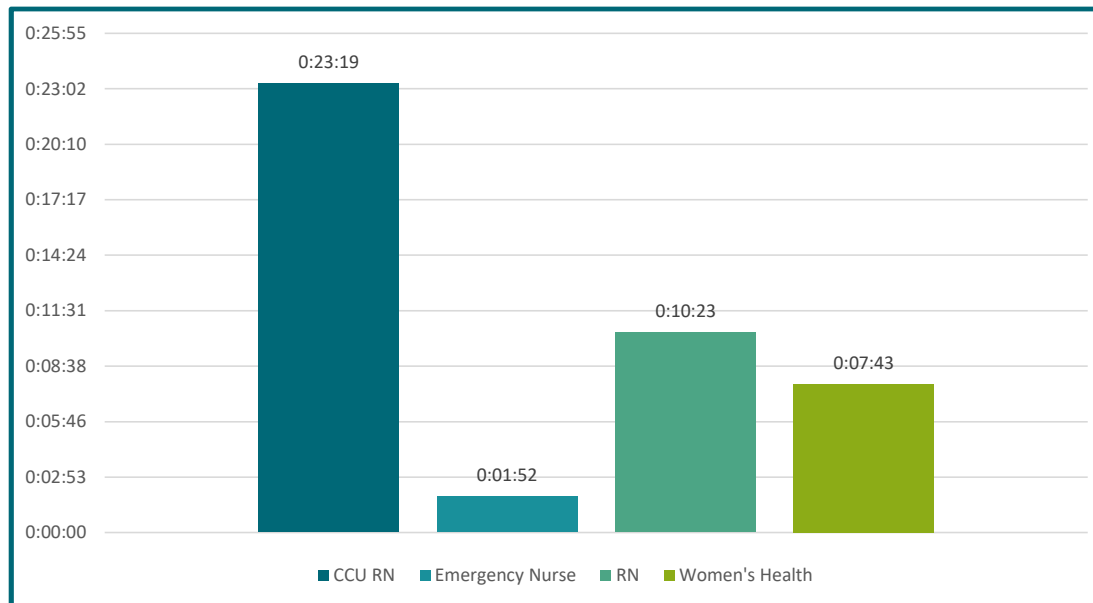

Documentation iView Time – Average Time per Patient by Position at EMMC

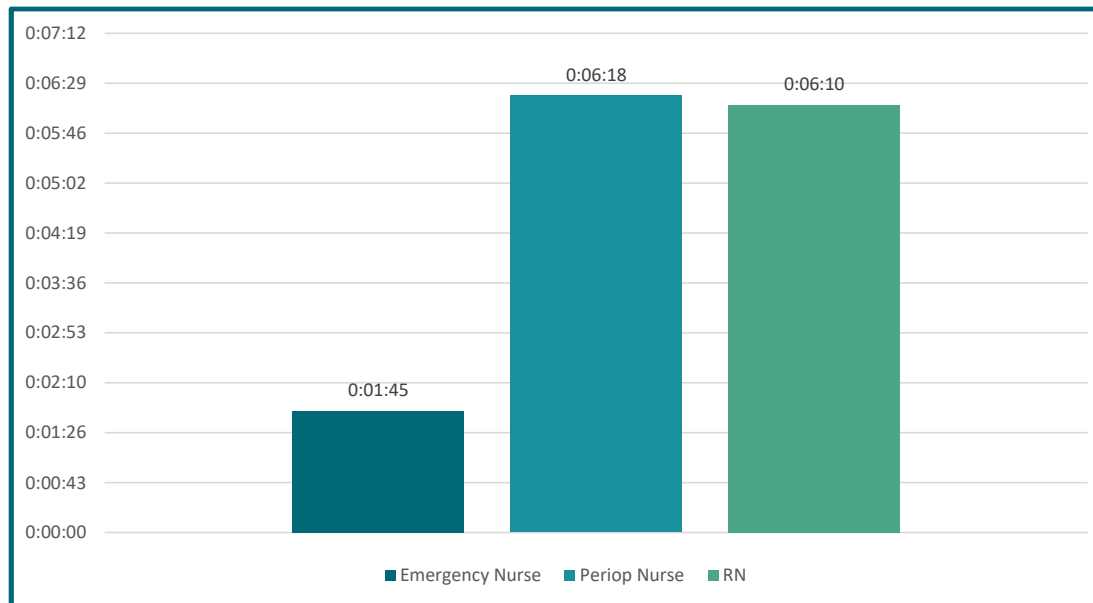

Documentation iView Time – Average Time per Patient by Position at Inland

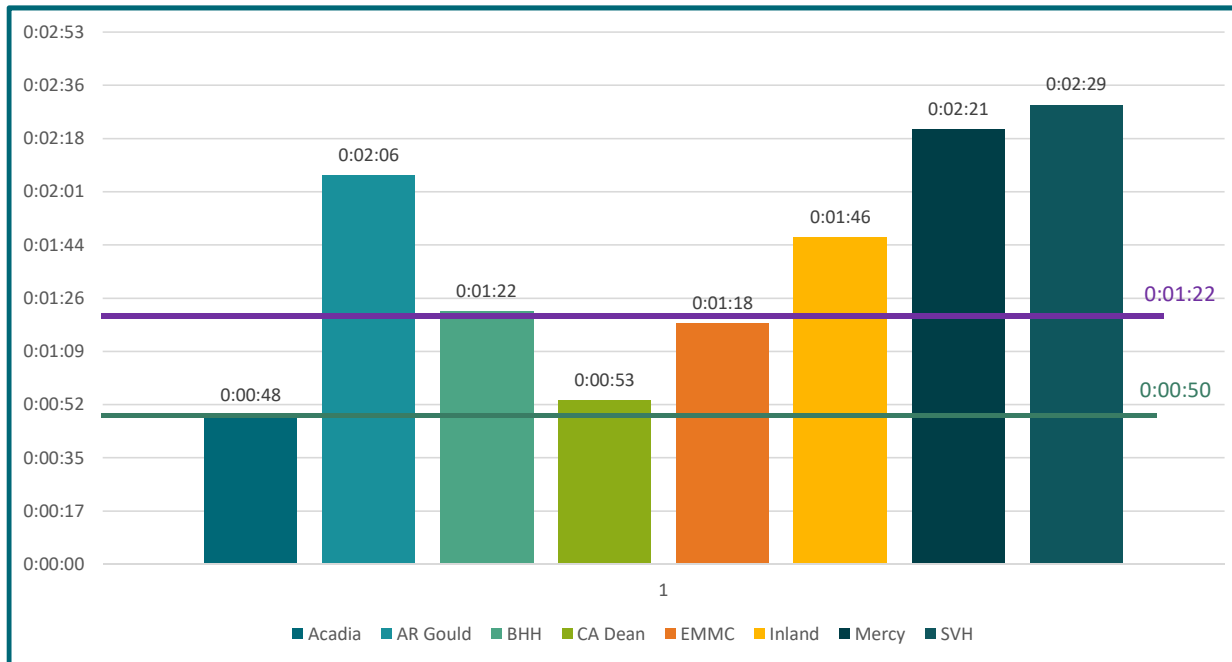

Documentation iView Time – Average Time per Patient by Position at Mercy

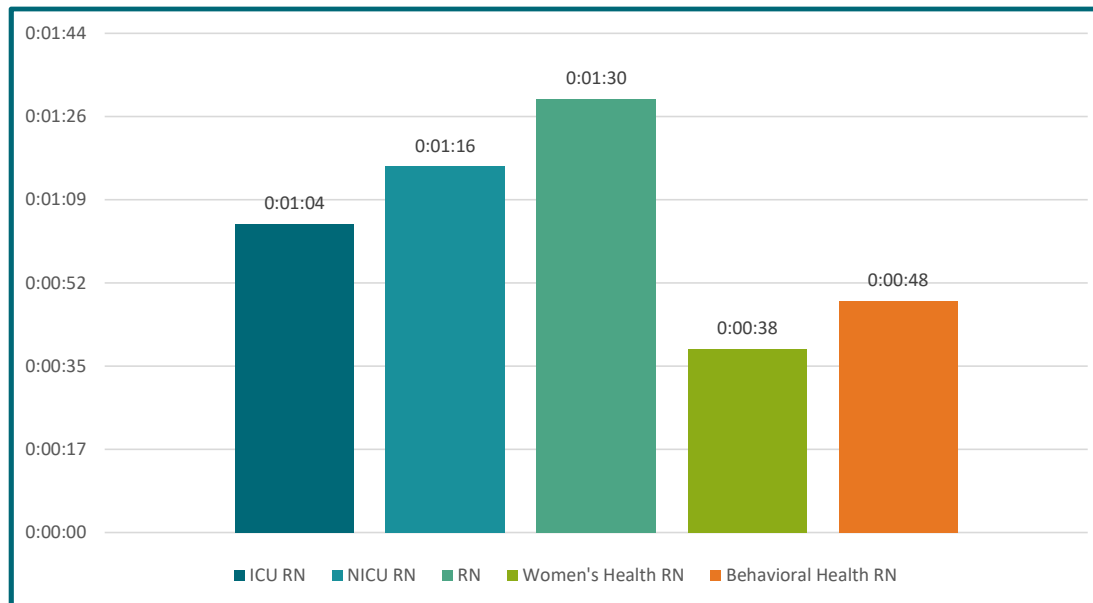

Documentation iView Time – Average Time per Patient by Position at SVH

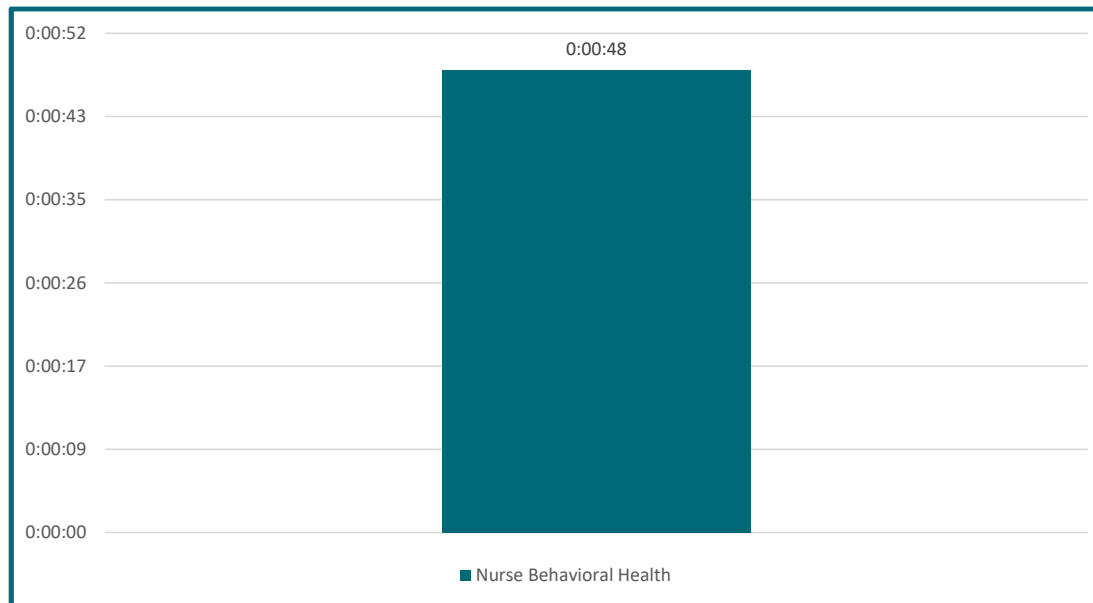

CareCompass RN Time per Patient by MO – Inpatient

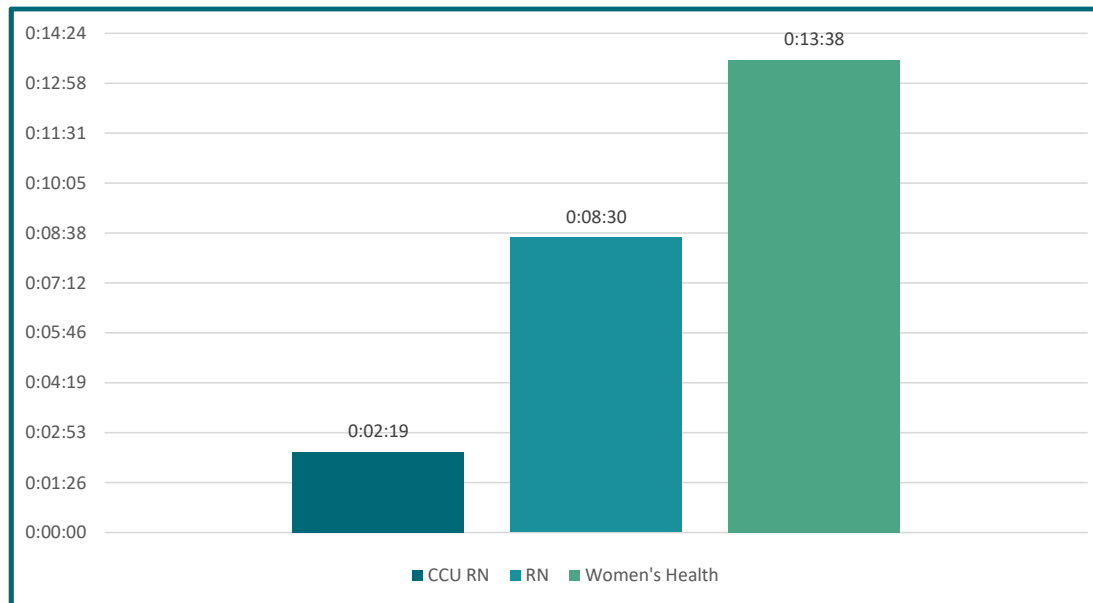

Documentation CareCompass Time – Average Time per Patient By Position – Inpatient

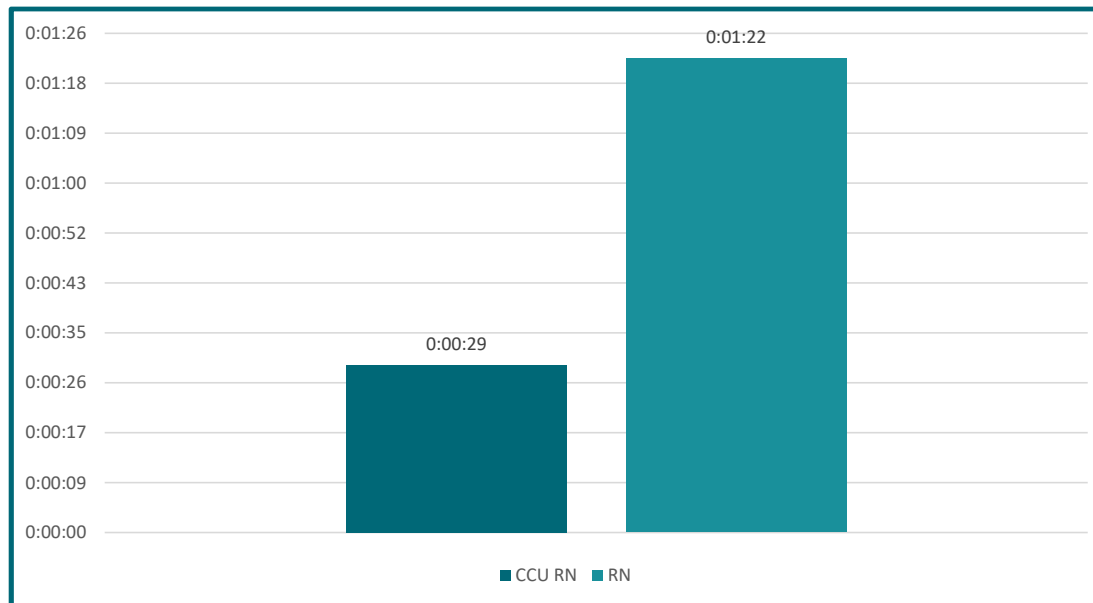

Documentation CareCompass Time – Average Time per Patient by Position at Acadia

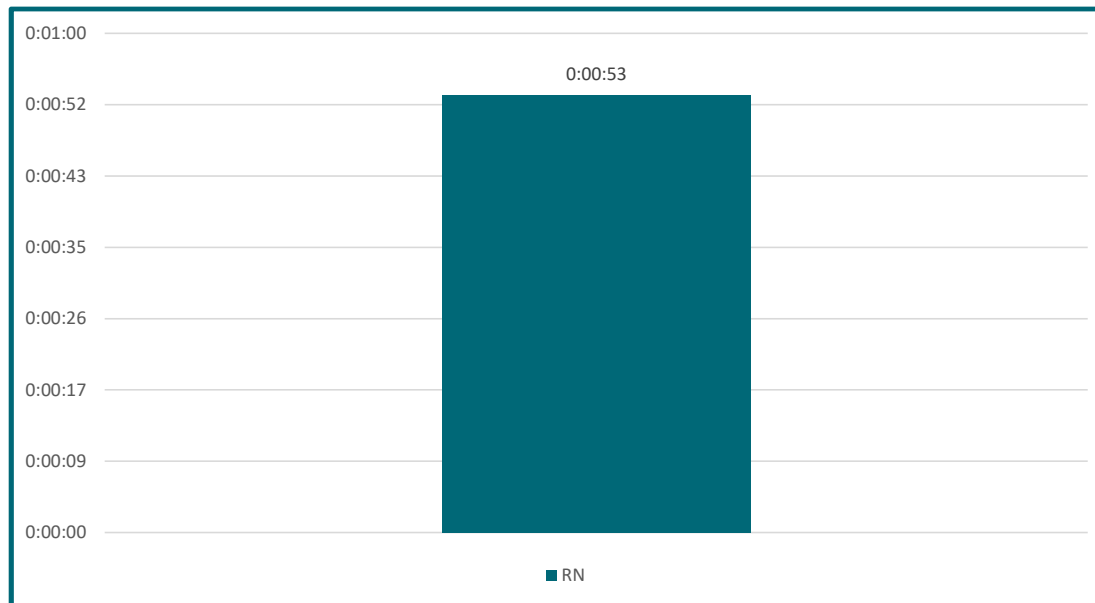

Documentation CareCompass Time – Average Time per Patient by Position at AR Gould

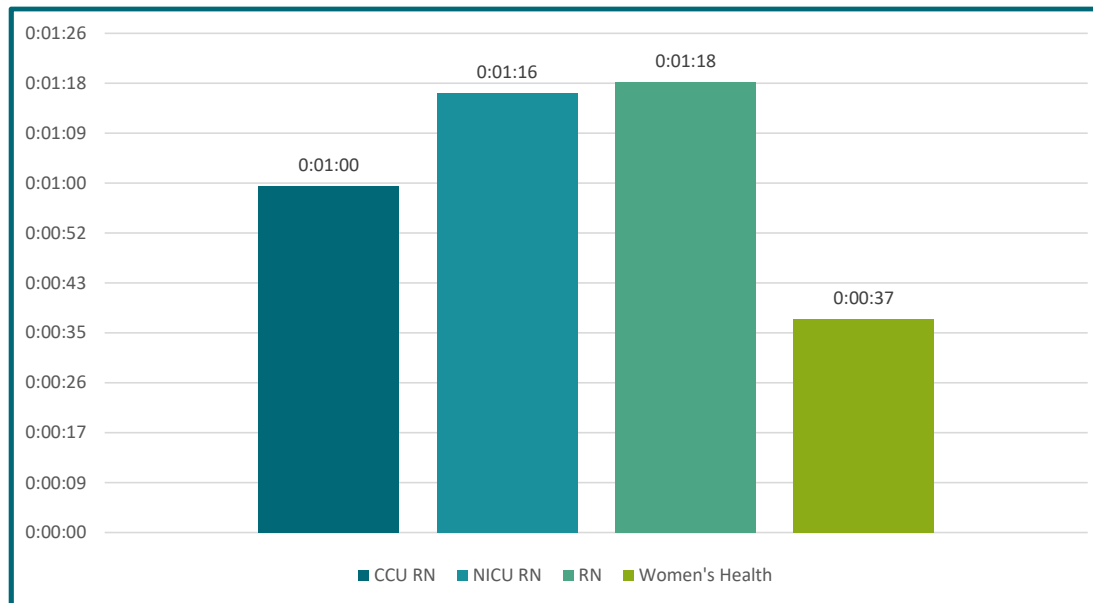

Documentation CareCompass Time – Average Time per Patient by Position at Blue Hill

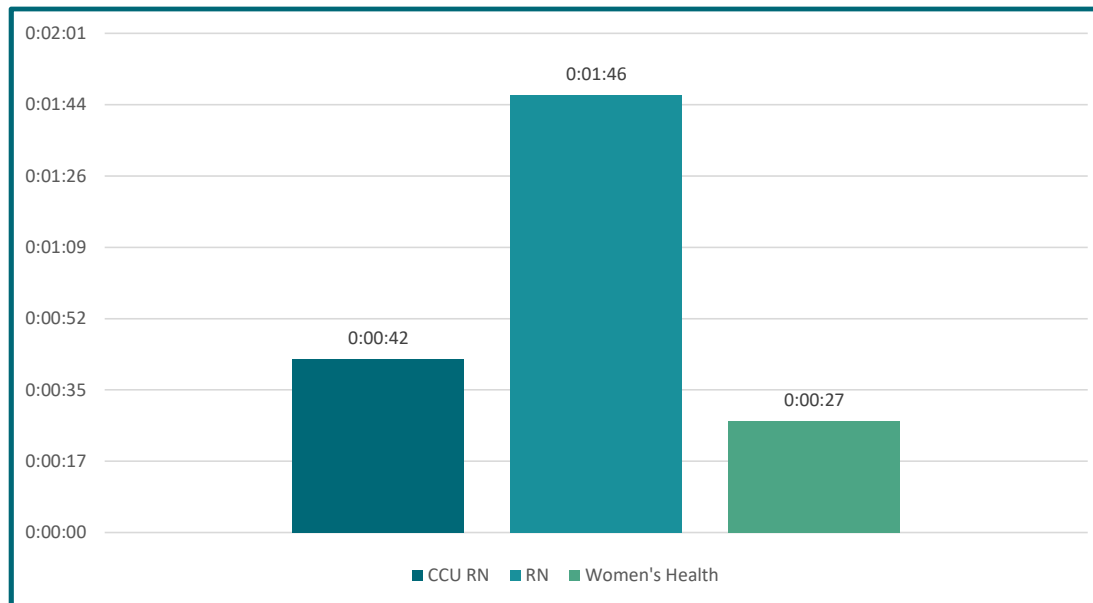

Documentation CareCompass Time – Average Time per Patient by Position at CA Dean

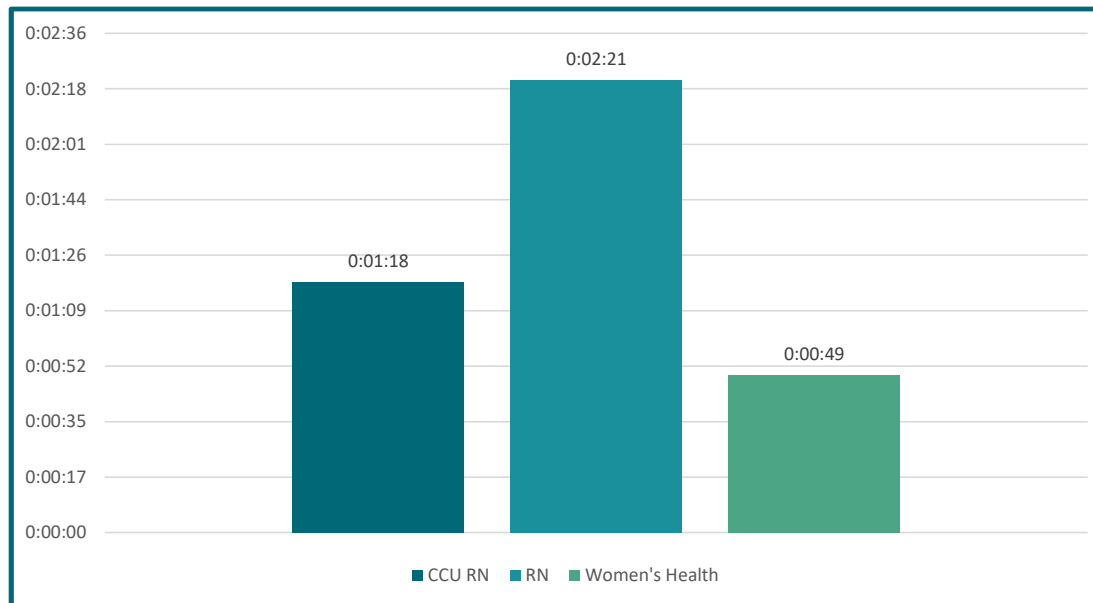

Documentation CareCompass Time – Average Time per Patient by Position at EMMC

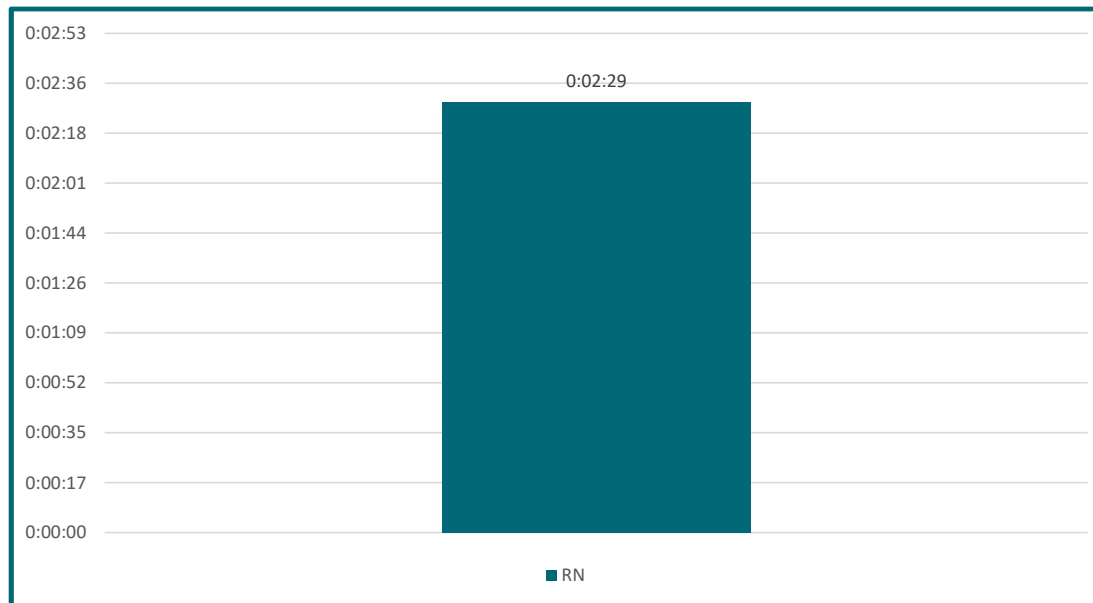

Documentation CareCompass Time – Average Time per Patient by Position at Inland

Documentation CareCompass Time – Average Time per Patient by Position at Mercy

Documentation CareCompass Time – Average Time per Patient by Position at SVH

Medication Barcode Scanning

Model Experience Alignment – Measure Details

Measure Name:

Medication Barcode Scanning

Measure Description:

This KPI is used to look at medications that have been administered to a patient and provides information on how often the scanning technology is being used for medication identification.

Measure Formula:

$$\frac{\text{Number of medication successfully scanned}}{\text{Number of medication administration events}}$$

Unit of Measure:

% (percentage)

Desired Trend Direction:

Increase

Model Experience Alignment – Medication Barcode Scanning

Application Experience

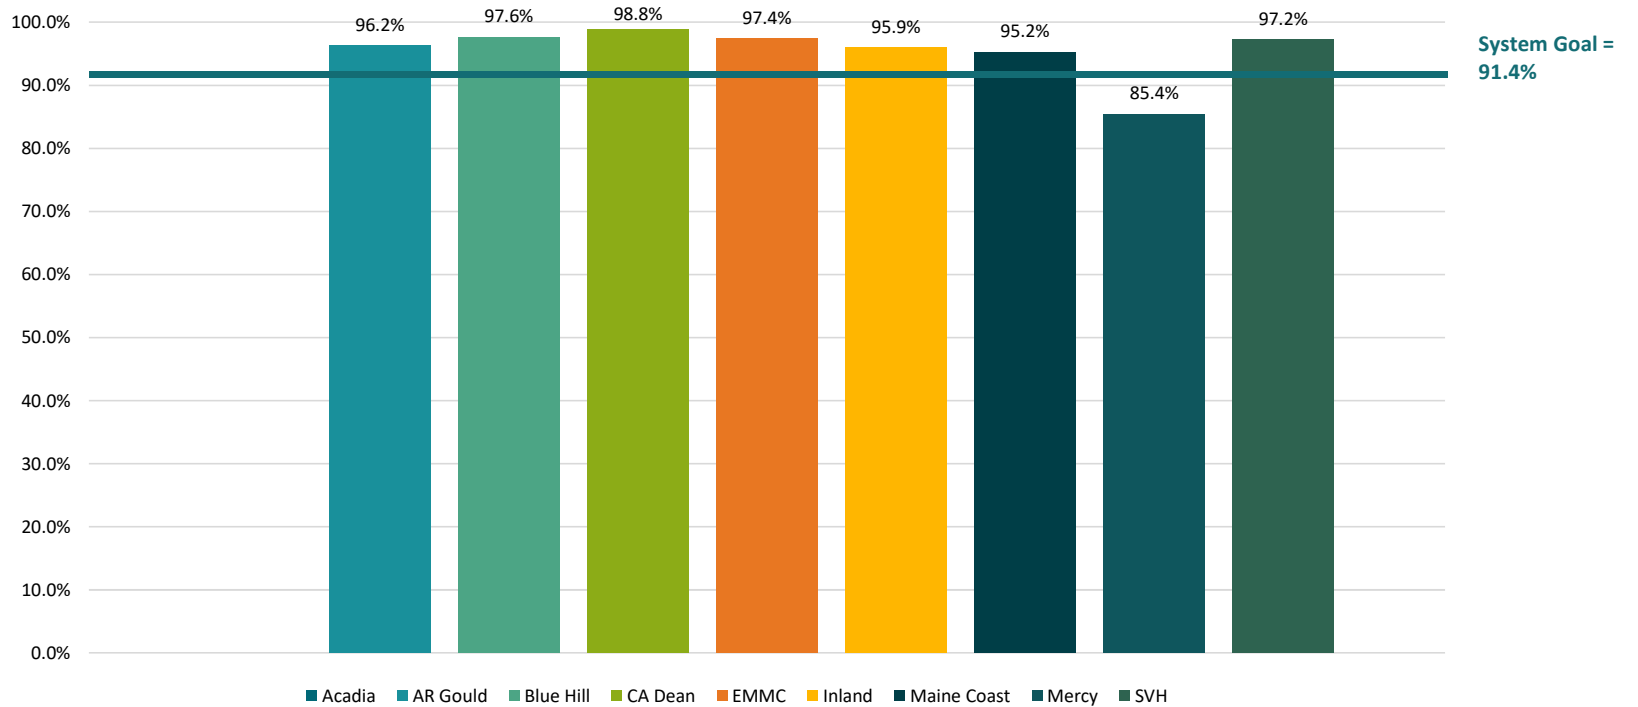

Recommendation	Status	Why Framework
<p>Barcode Medication Administration (BCMA) This check is used to determine if positions set up to administer medications have the correct build to scan medications before administration.</p>	Not Aligned	Application Experience
<p>Medication Administration Record Enabled This check is used to determine if Cerner's Medication Administration Record is in use at this site via timers. If the timers do not show the necessary activity, the below checks will not return any data. Use of the Medication Administration Record is a pre-requisite for Barcoded Medication Scanning.</p>	Aligned	Application Experience
<p>Medication Scan Override Reasons This check is used to determine if appropriate override reasons are available to clinicians to accurately document reasons for deviations in the medication bar code scanning process.</p>	Aligned	Application Experience
<p>Medication Scanning This check is used to determine if Cerner's Medication Bar Code Scanning solution is in use at this site via timers. If the timers do not show the necessary activity, the below checks will not return any data.</p>	Aligned	Application Experience
<p>PharmNet Inpatient This check is used to determine if Cerner's PharmNet Inpatient solution is in use at this site via timers. If the timers do not show the necessary activity, the below checks will not return any data.</p>	Aligned	Application Experience

Model Experience Alignment – Medication Barcode Scanning

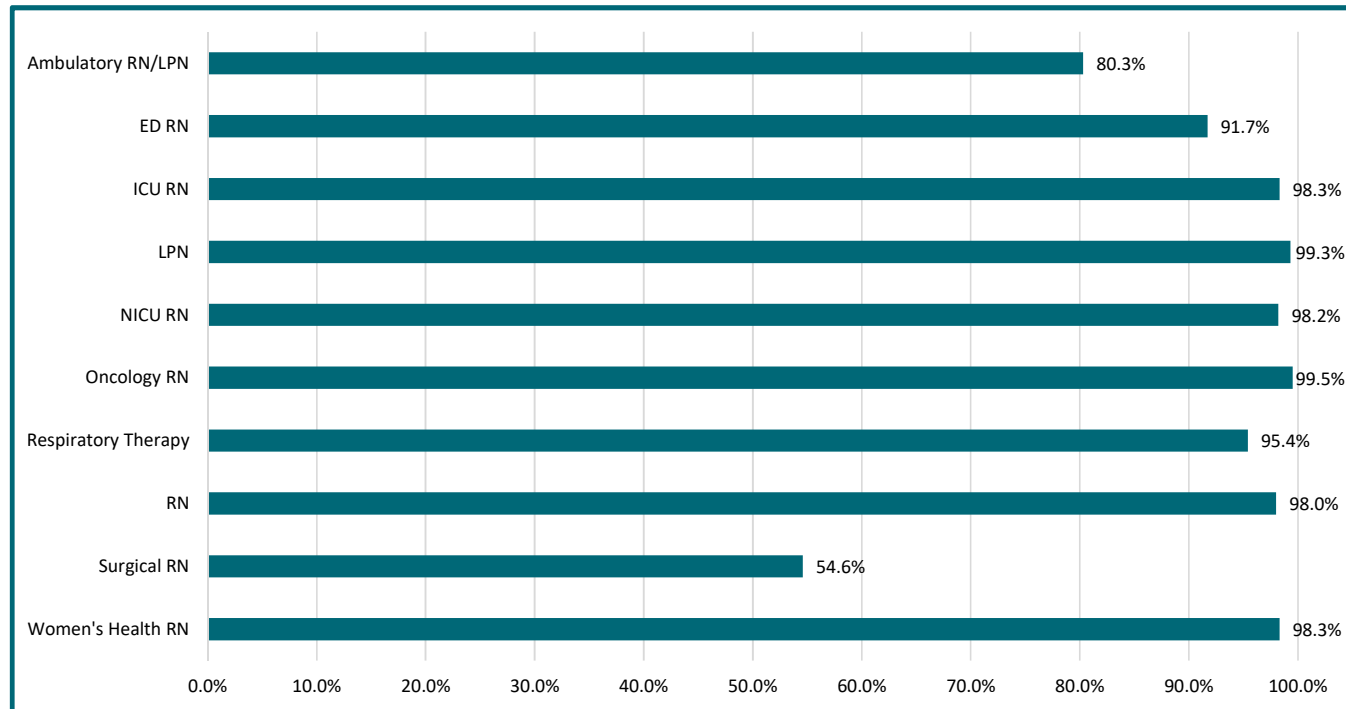

Process Alignment

Workflow	Workflow Step	Status	Why Framework
Connect Nursing - Barcode Medication Administration	Step 233 - Override Medication Scan. Tap on Reason (Required field indicated in Red) select reason or other and enter a reason.	Not Aligned	Application Experience
Connect Nursing - Barcode Medication Administration	Step 104 - Scan Medication(s). Was medication scan successful?	Not Aligned	Application Experience
